EXECUTIVE PROFILE

I set the standards and hold the boundaries so a workforce can move fast on AI without breaking anything. I am technically fluent enough to scope an AI problem, tell a good build answer from a bad one, and direct it to the finish. I am not the engineer. The AI products I have shipped are the proof I do not need to be.

I close the gap between AI investment and real workforce productivity. I spent 15 years at TIAA (Fortune 100 financial services, \$1.5T AUM), most recently leading AI adoption for the Client Services organization and the associate-transformation workstream of the Recordkeeping Transformation program. I conceived and led the team that launched a 9-module AI-powered career development platform, built first for a major transformation population and then rolled out company-wide, owning it from discovery and use-case scoping through governance and deployment. I built the adoption operating model that carried one approach across seven business areas, and the liaison and champion network that made it a community of practice rather than a broadcast. With Risk, Compliance, and Legal I shaped the acceptable-use standards that let AI ship in a regulated business, and I measured adoption by active usage, not headcount with access. Before TIAA, ten years in enterprise software at Pearson and Vangent. My M.S. in Instructional Technology grounds the work in how people learn and change.

INDEPENDENT AI PRODUCTS CONCEIVED AND SHIPPED

- **Future Me, Answered (futuremeansanswered.com), live in production:** I conceived the product, designed the 5-stage discovery framework, structured the 922-occupation career data, and built most of the application on Next.js and the Vercel AI SDK. My brother engineered the production backend.
- **CareerPointers (careerpointers.org), live:** I conceived the product and designed the 11-module journey, the multi-agent AI interview simulator, and the applicant CRM, and directed the build. My brother is co-founder and engineered the backend.

PROFESSIONAL EXPERIENCE

Director, Business Management

February 2022 - July 2026

TIAA (Fortune 100 Financial Services, \$1.5T AUM)

Business Manager (2016-2022) | Senior Business Management Specialist (2013-2016) | Business Consultant (2011-2013)

Led initiatives across the Client Services organization (~3,000 associates) and the associate-transformation workstream of TIAA's Recordkeeping Transformation program, partnering across IT, HR, Risk, and Compliance.

Workforce AI Enablement, Pilot to Production

- **Took an AI platform from idea to company-wide rollout (2024-2025):** Conceived and led the team that launched a 9-module AI-powered career development platform, built first for a major transformation population and then rolled out company-wide. Owned every stage, from discovery and use-case scoping through prioritization, phased rollout, governance, adoption strategy, and impact measurement.
- **Reached 1,500+ associates directly across 30+ town halls and team sessions:** Built and ran the multi-channel adoption program for the platform, engaging people in large sessions, team meetings, and one-on-one coaching rather than announcements.

- **Reported adoption in numbers a leader could act on:** Defined the success measures for the AI work, tracked them in SharePoint, and reported to senior leaders. I measured adoption by active usage, not headcount with access. Access is the easy number. Usage is the one that tells a leader whether the investment worked.

Operating Model, Center of Practice, and Governance

- **Built one adoption operating model so good work scaled instead of being rebuilt team by team:** Connected seven Client Services business areas through named liaisons, shared strategy, and peer learning, moving each from pilot to a sustained, supported way of working. Enablement, acceptable-use standards, and measurement, held in one place.
- **Made governance the thing that let AI ship, not the thing that stopped it:** Explored and prototyped first, then brought Risk, Compliance, and Legal in to set the hard limits once an idea was worth building. No client data or PII entered into the platform. No AI-initiated actions. Guided prompts and human oversight that keep the person in control of every decision.
- **Surfaced the permission exposure most AI rollouts find too late:** Owned SharePoint governance across a 125-site estate, remediating 1,763 files flagged for PII with IT. An assistant surfaces to a user everything they already have permission to reach, so permission sprawl is a live exposure on day one, not a later phase.
- **Built the champion network and community of practice that carried adoption:** Led project teams and directed contractors, then built the dotted-line network of liaisons, champions, and engagement leads that moved the work across Client Services.

Executive Engagement and Enterprise Change

- **Made the case to senior leaders in language they could act on:** Built and delivered executive read-outs, business cases, and quarterly business reviews, carrying progress, trade-offs, and prioritization decisions across the organization.
- **Built the upskilling program behind the tools:** Conceived and built Skills of the Future, a digital learning platform for Client Services. Led a team of 7 across 5 curriculum tracks, reaching 890 unique users and 1,156 community views. Tools do not create capability. Curriculum and practice do.
- **Led change management for workplace modernization across six TIAA locations (2022-2024):** Return-to-office, the Denver consolidation (44% footprint reduction), and the Frisco Corporate Center opening. Recognized as Change Champion.

Sales Engineer, Information Architect, Instructional Designer

2001 - 2011

Interactive Media / FT Knowledge / Pearson Performance Solutions / Vangent Human Capital

Continuous tenure through a chain of acquisitions, serving Fortune 500 enterprises and federal agencies.

- **Translated client business problems into what delivery teams had to build:** Worked directly with Fortune 500 clients (Unilever, Bank of America, Verizon Wireless, GE Capital, Regions Bank) to scope capability needs, design adoption approaches, and shape multi-year implementation plans. Architected the knowledge model behind an enterprise LCMS, single-source publishing across five Fortune 500 enterprises.

LEADERSHIP CAPABILITIES

AI Enablement & Operating Model: Generative AI Adoption Strategy | Workforce AI Enablement | Pilot-to-Production Scaling | Use-Case Discovery & Prioritization | Adoption Operating Model Design | Adoption KPIs & Impact Measurement | Champion Networks & Communities of Practice | AI Literacy & Upskilling | Prompt Engineering | Agentic & Multi-Agent LLM Workflows | Hands-on across Claude, Microsoft 365 Copilot, ChatGPT, Amazon Q Developer, Kiro, GitHub Copilot

Governance & Delivery: Responsible AI Governance & Acceptable-Use Standards | Risk, Compliance & Legal Partnership | Permission & Access Exposure Review | Team Leadership & Contractor Direction | Change Management | Enterprise Vendor Selection (recognition platform, not AI)

Enterprise & Executive: Enterprise Software Delivery (LCMS, ATS) | Microsoft 365, SharePoint Governance (125-site estate), Teams | Executive Read-Outs & Business Cases | Program Budget (~\$500K)

EDUCATION & CERTIFICATIONS

M.S. Instructional Technology, Bloomsburg University, PA (4.0 GPA) | **B.A. Art**, Millersville University, PA

Certifications: Google Generative AI for Leaders | Lean for Financial Services, TIAA (inaugural class)
