EXECUTIVE PROFILE

Healthcare AI initiatives fail when clinicians aren't brought along. I design adoption programs where technology earns trust before it earns usage, so AI investments produce real behavior change, not shelfware. At TIAA, I conceived and led CareerSpark: an AI platform requiring the same discipline as clinical AI deployment. I met resistant users where they were, built trust through transparency, and measured behavioral change rather than just access. My M.S. in Instructional Technology, responsible AI focus, and track record of human-centered change make me well-suited to lead adoption programs where patient safety and clinician trust are on the line.

PROFESSIONAL EXPERIENCE

Director, Workplace Experience & Associate Engagement

February 2022 - Present

TIAA (Fortune 100, $1.6T AUM | 16,000 Associates)

Business Manager (2016-2022) | Senior Business Management Specialist (2013-2016) | Business Consultant (2011-2013)

Led enterprise AI adoption, workforce transformation, and learning programs across 16,000+ associates in a highly regulated financial services environment, navigating the same compliance requirements and resistant populations healthcare organizations face when deploying AI to clinical staff.

AI Adoption & Human-Centered Change Management

- **AI Platform Adoption - CareerSpark:** Conceived and led launch of an AI-powered career platform enterprise-wide. The adoption challenge mirrored clinical AI deployment: a skeptical workforce, trust barriers, and the need to demonstrate value before demanding behavior change. Reached 1,500+ active users through town halls, one-on-one coaching, and team sessions, measuring active usage, not just access.
- **Mandatory Change Adoption (2023-2024):** Led adoption strategy for 700 associates transitioning to a new workspace model they didn't choose, in a regulated environment. Reduced footprint 44% across 5 floors while maintaining trust and engagement. Health systems face the same challenge when rolling out AI to clinical staff who didn't ask for it.
- **Responsible AI & Ethical Adoption:** Designed AI adoption strategy grounded in transparency, user agency, and measurable behavioral outcomes. Built change champion networks so adoption spread through the organization, not just top-down.

Workforce Development & Learning Programs

- **Skills of the Future Program (2024):** Conceived and built enterprise learning platform for critical future skills. Led team of 7 to develop 5 curriculum tracks with 12-17 modules each. Reached 890 unique users, 1,156 engagement interactions via Microsoft Viva Engage.
- **Multi-Modal Training at Scale:** Designed and delivered blended learning programs (live facilitation, virtual sessions, self-paced modules, coaching) reaching 1,500+ associates across the enterprise.
- **Virtual Platform Innovation (2020):** Designed and launched virtual engagement platform reaching 800+ associates when pandemic eliminated in-person events, including regional staff previously excluded from major-office-only programming. Model replicated by 3+ teams.

Culture, Engagement & Organizational Change

- **Recognition & Cultural Transformation (2019-2025):** Administered recognition program (~$500K budget) driving 395% increase in engagement (2020-2021). Client Services grew from 34% to 44% of all company-wide recognitions by 2023. This kind of cultural transformation - measurable, sustained, and scaled - is the foundation for successful AI adoption in any workforce, including clinical teams.
- **Enterprise Workplace Rollouts:** Led technology-enabled transitions across multiple sites (Denver: 700 associates; Frisco: 500+ associates; Charlotte campus restack), serving as primary liaison across HR, IT, Facilities, and leadership. Built stakeholder communication plans, change champion and ambassador networks, and feedback loops that maintained trust through disruption.

Product Leader & Enterprise Solutions Architect *2000 - 2011*

Pearson Performance Solutions / Vangent, Inc.

Leading global provider of human capital management and enterprise technology solutions for Fortune 500 and government clients

- **Enterprise Technology Adoption:** Consulted with Fortune 500 clients (Unilever, Bank of America, Verizon Wireless) on workforce technology strategy and adoption; managed cross-functional teams through complex multi-year enterprise software implementations requiring the same stakeholder alignment health systems navigate
- **Product Leadership:** Directed product roadmap for enterprise talent platforms; drove enhancements reducing client hiring costs 50-80% and improving speed-to-hire 50%+ through technology-enabled workflow change
- **Government-Scale Adoption:** Supported enterprise platform deployment for Department of Commerce (2010 Census hiring), technology adoption at government scale with the same kind of compliance requirements healthcare organizations face.

CORE COMPETENCIES

Healthcare AI Adoption: Human-Centered AI Strategy | Workflow Change Management | Responsible & Ethical AI | AI Governance | Change Champion Networks | Ambassador Programs

Workforce & Learning: Instructional Design (M.S.) | Curriculum Development | Blended Learning | Workforce Education | Upskilling & Reskilling | Train the Trainer | Facilitation | Coaching | Organizational Development | Learning Management Systems

Strategic Leadership: Executive Stakeholder Management | Cross-Functional Team Leadership | Program Management | Organizational Change | Strategic Roadmap | Influence Without Authority | ROI & KPI Measurement | Budget Management (~$500K) | Vendor Management

EDUCATION & RECOGNITION
