OPERATING FRAMEWORK

EXECUTIVE PROFILE

My work has always been about how people learn and grow at work, from enterprise learning platforms to an AI-powered development platform I conceived and led. My M.S. in Instructional Technology is the discipline underneath all of it, and I build with AI myself.

I design talent and learning programs and then own the operational work of getting them delivered, adopted, and measured. I spent 15 years at TIAA (Fortune 100, \$1.5T AUM) building enterprise capability, most recently conceiving and launching a 9-module AI-powered career development platform, built for a major transformation population and then rolled out company-wide. I ran the operating framework that unified seven business areas under a single approach. Before TIAA, a decade in enterprise software at Pearson and Vangent architecting learning technology and single-source content systems for Fortune 500 buyers. I lead through large matrixed organizations, facilitate for technical and non-technical audiences, and put AI to work in how people learn.

PROFESSIONAL EXPERIENCE

Director, Business Management

February 2022 - July 2026

TIAA (Fortune 100 Financial Services, \$1.5T AUM)

Business Manager (2016-2022) | Sr. Management Specialist (2013-2016) | Business Consultant (2011-2013)

Led learning and capability initiatives across the Client Services organization (~3,000 associates) and the associate-transformation workstream of TIAA's Recordkeeping Transformation program. Led multi-disciplinary teams, directed contractors, and partnered across HR, Workplace Services, Risk and Compliance, and IT.

Learning Experience Design and AI-Enabled Capability Building

- **Conceived, designed, and launched a 9-module AI-powered career development platform (2024-2025):** Built for a major transformation population and then rolled out company-wide to 16,000 associates. Led the work end to end, from discovery and use-case scoping through learning experience design, phased rollout, governance, adoption, and impact measurement.
- **Built and ran the Skills of the Future curriculum with a team of 7:** Designed 5 tracks of 12-17 modules each on future, digital-first, and AI skills, mapped to real role trajectories rather than abstract frameworks. 890 associates engaged across 1,156 interactions.
- **Proved a faster learning-design model inside the enterprise:** Built the platform's Manager Guide on Amazon Q, an enterprise-approved tool, in one week against a months-long traditional path, then showed teams what AI-accelerated design looks like in practice.

Facilitation, Adoption, and Change Delivery

- **Reached 1,500+ associates directly across 30+ town halls, roadshows, and team sessions:** Designed the enablement around work people already cared about rather than a tour of the technology, for technical and non-technical audiences alike. Coached associates and people leaders one-on-one on career growth and AI-assisted ways of working.
- **Led workplace modernization for 3,000+ associates across six locations (2022-2024):** Owned change strategy through return-to-office, the Denver consolidation (44% real estate footprint reduction, 700+ associates moved to hoteling), and the Frisco Corporate Center opening. Recognized as Change Champion.

- **Cleared Risk, Compliance, and Legal without stalling delivery:** Prototyped in a sandbox first, then brought them in to set the hard limits once the idea was worth building. No associate data on company servers, no AI-initiated actions, guided prompts that keep the person in control of the decision.

Operating Model, Program Execution, and Governance

- **Built one operating framework across seven Client Services business areas:** Connected them through named liaisons, shared strategy, and peer learning across Workplace, Associate Engagement, and Rewards and Recognition, so one approach held across all seven instead of seven separate builds. Established the operating rhythm, prioritization, and resource decisions that kept it running.
- **Made the case to senior leaders in language they could act on:** Built and delivered executive read-outs, people-leader updates, and quarterly business reviews carrying progress, trade-offs, and prioritization decisions across the organization.
- **Evaluated vendors and selected an enterprise platform:** Grew the Client Services recognition program 395% on a \$500K budget, then earned a seat on TIAA's corporate team that evaluated and selected the new enterprise recognition platform.

Sales Engineer, Information Architect, Instructional Designer

2001 - 2011

Interactive Media / FT Knowledge / Pearson Performance Solutions / Vangent

A decade in enterprise learning technology. Continuous tenure through a chain of acquisitions, serving Fortune 500 enterprises and federal agencies.

- **Architected the Revolver LCMS knowledge model:** Separated core content from contextual content so a single source could publish as full lessons, field job aids, micro-learning, or expert reviews based on the learner's context. Single-source publishing two decades before it was common, deployed across five Fortune 500 enterprises. Traveled internationally training enterprise teams.
- **Consulted with Fortune 500 clients on workforce capability:** Worked directly with Unilever, Bank of America, Verizon Wireless, GE Capital, and Royal Bank of Canada as sales engineer, instructional designer, and information architect, scoping learning needs and shaping multi-year implementation plans.
- **Delivered large-scale enterprise platform programs:** Led enterprise platform deployments for the 2010 Census and Extra Space Storage, redesigning the hiring workflows to cut client hiring costs 50-80% and speed-to-hire by more than half.

LEADERSHIP CAPABILITIES

Talent & Learning Development: Learning Experience Design | Instructional Design (M.S.) | Curriculum Architecture | Skills-Based Development | Onboarding & Enablement | Facilitation & Group Learning | Manager Enablement & Capability Building

AI-Enabled Learning: AI Adoption & Fluency | Generative AI Tools | AI Learning Solutions | Responsible AI Governance | Daily builder across Claude, ChatGPT, Gemini, Kiro, GitHub Copilot

Operating Model & Execution: Operating Rhythm & Governance | Prioritization & Resource Allocation | Program & Portfolio Management | Adoption & Impact Measurement | Change Management | Vendor Evaluation & Selection

Learning Technology & Enterprise: Learning Ecosystems (LMS, LXP, LCMS) | Content Authoring & Single-Source Publishing | Learning Analytics | Matrixed Enterprise Delivery | Executive Read-Outs | Budget (~\$500K)

INDEPENDENT AI PRODUCTS CONCEIVED AND SHIPPED

- **Future Me, Answered (futuremeanswered.com), live:** I conceived the product, designed the 5-stage discovery framework, structured the career data across 922 paths, and directed the build on Next.js and multi-provider AI. My brother is the primary engineer.
- **CareerPointers (careerpointers.org), live:** I conceived and designed the 11-module journey, its multi-agent AI interview simulator, and personalized delivery, and directed the build on Next.js and Stripe. My brother is the primary engineer.

EDUCATION & CERTIFICATIONS

M.S. Instructional Technology, Bloomsburg University (now Commonwealth University), PA (4.0 GPA) | **B.A. Art,** Millersville University, PA

Certifications: Google Generative AI for Leaders | Lean for Financial Services, TIAA (inaugural class)
