EXECUTIVE PROFILE

I am technically fluent enough to scope a problem, tell a good technical answer from a bad one, and direct a build to the finish. I am not the engineer. The AI products I have shipped are the proof I do not need to be.

I close the gap between AI investment and real workforce change. I spent 15 years at TIAA (Fortune 100, \$1.5T AUM), most recently leading AI adoption and workforce change. I conceived and launched a 9-module AI-powered career development platform, built for a major transformation population and then rolled out company-wide, and owned it from the first discovery conversation through use-case scoping, governance, deployment, and measured use. I built the operating framework that connected seven Client Services business areas so one approach held instead of seven. Before TIAA, ten years in enterprise software at Pearson and Vangent, selling, architecting, and implementing LCMS and ATS platforms for Fortune 500 buyers. My M.S. in Instructional Technology grounds the enablement work in design rather than opinion.

INDEPENDENT AI PRODUCTS CONCEIVED AND SHIPPED

- **Future Me, Answered (futuremeansanswered.com), live in production:** I conceived the product, designed the 5-stage discovery framework, modeled the career data across 922 paths, and directed the build on Next.js, the Vercel AI SDK, and multi-provider AI. My brother is the primary engineer. I own the product decisions and stay close enough to the technology to judge what is worth building.
- **CareerPointers (careerpointers.org), live:** I conceived the product and designed the 11-module journey, the multi-agent AI interview simulator, the applicant CRM, and the employer-personalized portfolio delivery. I directed the build on Next.js and Stripe. My brother is the primary engineer.

PROFESSIONAL EXPERIENCE

Director, Business Management

February 2022 - July 2026

TIAA (Fortune 100 Financial Services, \$1.5T AUM)

Business Manager (2016-2022) | Sr. Management Specialist (2013-2016) | Business Consultant (2011-2013)

Led enterprise initiatives across the Client Services organization (~3,000 associates) and the associate-transformation workstream of TIAA's Recordkeeping Transformation program. Partnered across HR, Workplace Services, Risk and Compliance, and IT.

AI Adoption, Use-Case Pipeline, and Governance

- **Took an AI platform from idea to embedded use across the enterprise (2024-2025):** Conceived, designed, and launched a 9-module AI-powered career development platform, built for a major transformation population and then rolled out company-wide. Owned every stage, from discovery and use-case scoping through prioritization, phased rollout, governance, adoption strategy, and impact measurement.
- **Cleared Risk, Compliance, and Legal without stalling the build:** Prototyped and pressure-tested the idea in a sandbox first, then brought Risk, Compliance, and Legal in to set the hard limits once it was worth building. No associate data on company servers. No AI-initiated actions. Guided prompts that keep the associate in control of the decision.

- **Measured adoption by active usage, not headcount with access:** Defined the success measures for the AI capability work and reported the usage number to senior leaders. Access is the easy number. Usage is the one that tells a leader whether the investment worked.
- **Proved a faster delivery model inside the enterprise:** Built the platform's Manager Guide on Amazon Q, an enterprise-approved tool, in one week against a months-long traditional path, then showed teams what AI-accelerated delivery looks like in practice.

Team Leadership and Enablement Program Design

- **Built and ran the Skills of the Future curriculum with a team of 7:** A separate capability program from the career platform. Designed 5 tracks of 12-17 modules each on future and digital-first skills for Client Services and other large associate populations. 890 associates engaged across 1,156 interactions.
- **Led project teams of 10+ and directed contractors and contingent workers:** Built the dotted-line network of liaisons, champions, and engagement leads that carried the work across the Client Services organization. My teams have been lean on purpose. The reach came from the network, not the headcount.
- **Designed the enablement people actually showed up for:** Built the town halls, roadshows, and coaching around work associates already cared about rather than a tour of the technology, for technical and non-technical audiences alike.

Operating Model, Executive Engagement, and Change Delivery

- **Built one operating framework across seven business areas so good work scaled instead of being rebuilt:** Connected seven Client Services business areas through named liaisons, shared strategy, and peer learning across Workplace, Associate Engagement, and Rewards and Recognition. One approach run seven times, in place of seven approaches.
- **Made the case to senior leaders in language they could act on:** Built and delivered executive read-outs, town halls, people-leader updates, and quarterly business reviews, carrying progress, trade-offs, and prioritization decisions across the organization.
- **Evaluated vendors and selected an enterprise platform:** Earned a seat on TIAA's corporate selection team that chose the enterprise recognition platform, after growing the Client Services program 395% on a \$500K budget.
- **Led workplace modernization for 3,000+ associates across six locations (2022-2024):** Owned change strategy through return-to-office, the Denver consolidation (44% real estate footprint reduction, 700+ associates moved to hoteling), and the Frisco Corporate Center opening. Recognized as Change Champion.

Sales Engineer, Information Architect, Instructional Designer

2000 - 2011

Interactive Media / FT Knowledge / Pearson Performance Solutions / Vangent Human Capital

Ten years in enterprise software. Continuous tenure through a chain of acquisitions, serving Fortune 500 enterprises and federal agencies.

- **Sat between the client's business problem and the team that had to build it, for ten years:** Worked directly with Fortune 500 clients (Unilever, Bank of America, Verizon Wireless, GE Capital, Regions Bank) to scope capability needs, design adoption approaches, and shape multi-year implementation plans.
- **Carried the technical answer into the room without being the developer:** Served as sales engineer, knowledge engineer, information architect, and instructional designer across enterprise LCMS and ATS platforms. Field-driven ATS enhancements helped clients cut hiring costs 50-80% and cut speed-to-hire in half.

LEADERSHIP CAPABILITIES

AI & Transformation: AI Adoption Strategy | Use-Case Discovery, Prioritization & Sequencing | Responsible AI Governance | AI Enablement Roadmaps | Agentic AI & Multi-Agent Workflows | LLM & API Fluency | Daily builder across Claude, ChatGPT, Gemini, Kiro, GitHub Copilot

Operating Model & Delivery: Operating Framework Design | Team Leadership & Contractor Direction | Adoption & Impact Measurement | Change Management | Risk, Compliance & Legal Partnership | Vendor Evaluation & Selection

Enterprise & Executive: Enterprise Software Delivery (LCMS, ATS) | Executive Read-Outs & Decision Forums | Cross-Functional Influence | Workshop Design & Facilitation | Budget Management (~\$500K)

EDUCATION & CERTIFICATIONS

M.S. Instructional Technology, Bloomsburg University, PA (4.0 GPA) | **B.A. Art,** Millersville University, PA

Certifications: Google Generative AI for Leaders | Lean for Financial Services, TIAA (inaugural class)
