EXECUTIVE PROFILE

I am technically fluent enough to scope a problem, tell a good technical answer from a bad one, and direct a build to the finish. I am not the engineer. The AI products I have shipped are the proof I do not need to be.

I close the gap between AI investment and real workforce change, and I have done it in one of the most heavily regulated industries there is. I spent 15 years at TIAA (Fortune 100 retirement services, \$1.6T AUM, operating under fiduciary duty, ERISA, and SEC oversight), most recently leading AI adoption and workforce change. I conceived and launched CareerSpark, a 9-module AI capability platform rolled out enterprise-wide, and owned it from the first discovery conversation through governance, deployment, and measured use. I built the operating framework that connected seven Client Services business areas, and I led workplace modernization for 3,000+ associates across six locations. Before TIAA, ten years at Pearson and Vangent sitting between Fortune 500 clients and the teams that built what they bought. My M.S. in Instructional Technology grounds the adoption work in design rather than opinion.

INDEPENDENT AI PRODUCTS CONCEIVED AND SHIPPED

The reason I can sit with an engineering team, judge the trade-offs, and keep a decision moving without pretending to be the engineer.

- **Future Me, Answered (futuremeanswered.com), live in production:** I conceived the product, designed the 5-stage discovery framework, modeled the career data across 922 paths, and directed the build on Next.js, the Vercel AI SDK, and multi-provider AI. My brother is the primary engineer. I own the product decisions and stay close enough to the technology to judge what is worth building and what is not.
- **CareerPointers (careerpointers.org), live:** I conceived the product and designed the 11-module journey, the multi-agent AI interview simulator, the applicant CRM, and the employer-personalized portfolio delivery. I directed the build on Next.js and Stripe and write production code by directing AI tooling. My brother is the primary engineer.

PROFESSIONAL EXPERIENCE

Director, Business Management

February 2022 - July 2026

TIAA (Fortune 100 Retirement Services, \$1.6T AUM)

Business Manager (2016-2022) | Sr. Management Specialist (2013-2016) | Business Consultant (2011-2013)

Led enterprise initiatives across the Client Services organization (~3,000 associates). Led the associate-transformation workstream of TIAA's Recordkeeping Transformation program. Partnered across HR, Workplace Services, Facilities, Risk and Compliance, and IT.

AI Adoption, Governance, and Measured Impact

- **Took an AI platform from idea to embedded use across the enterprise (2024-2025):** Conceived, designed, and launched CareerSpark, a 9-module AI capability platform rolled out enterprise-wide. Owned every stage, from discovery and use-case scoping through governance, deployment, adoption strategy, and impact measurement. Ran 30+ town halls and events that reached 1,500+ associates directly.

- **Cleared Risk, Compliance, and Legal without stalling the build:** Prototyped first, then brought Risk, Compliance, and Legal in to set the hard limits once it was worth building. No associate data on company servers. No AI-initiated actions. Guided prompts that keep the associate in control. In a fiduciary business, that clearance is the difference between a tool that ships and one that dies in review.
- **Measured adoption by active usage, not headcount with access:** Defined the success measures for the AI capability work and reported the usage number to senior leaders. Access is the easy number. Usage is the one that tells a leader whether the investment worked.
- **Built and ran the Skills of the Future curriculum with a team of 7:** A separate capability program from CareerSpark. Designed 5 tracks of 12-17 modules each on future and digital-first skills for Client Services and other large associate populations. 890 associates engaged across 1,156 interactions.
- **Proved a faster delivery model inside the enterprise:** Built the CareerSpark Manager Guide on Amazon Q in one week against a months-long traditional path, then used it to show teams what AI-accelerated delivery actually looks like.

Operating Model, Investment Case, and Executive Engagement

- **Built one operating framework across seven business areas so good work scaled instead of being rebuilt:** Connected seven Client Services business areas through named liaisons, shared strategy, and peer learning across Workplace, Associate Engagement, and Rewards and Recognition. One approach run seven times, in place of seven approaches.
- **Made the case to senior leaders in language they could act on:** Built and delivered executive read-outs, town halls, people-leader updates, and quarterly business reviews, carrying progress, trade-offs, and prioritization decisions across the organization.
- **Evaluated vendors and selected an enterprise platform:** Earned a seat on TIAA's corporate selection team that chose the enterprise recognition platform, after growing the Client Services program 395% on a \$500K budget.

Change Delivery

- **Led workplace modernization for 3,000+ associates across six locations (2022-2024):** Owned change strategy through return-to-office, the Denver consolidation (44% real estate footprint reduction, 700+ associates moved to hoteling), and the Frisco Corporate Center opening for 500+ associates. Recognized as Change Champion.

Sales Engineer, Information Architect, Instructional Designer

2000 - 2011

Interactive Media / FT Knowledge / Pearson Performance Solutions / Vangent Human Capital

- **Sat between the client's business problem and the team that had to build it, for ten years:** Worked directly with Fortune 500 clients (Unilever, Bank of America, Verizon Wireless, GE Capital, Regions Bank) to scope capability needs, design adoption approaches, and shape multi-year implementation plans across business, technology, and end-user audiences.
- **Carried the technical answer into the room without being the developer:** Served as sales engineer, knowledge engineer, information architect, and instructional designer across enterprise LCMS and ATS platforms. Field-driven ATS enhancements helped clients cut hiring costs 50-80% and cut speed-to-hire in half.

LEADERSHIP CAPABILITIES

AI & Transformation: AI Adoption Strategy | Use-Case Discovery & Prioritization | AI Enablement Roadmaps | Responsible AI Governance | Agentic AI & Multi-Agent Workflows | Daily builder across Claude, ChatGPT, Gemini, Kiro, GitHub Copilot

Governance & Regulated Delivery: Risk, Compliance & Legal Partnership | Fiduciary & SEC-Regulated Delivery | Decision Forums

Operating Model & Executive: Operating Framework Design | Business Case Development | Adoption & Impact Measurement | Budget Management (~\$500K) | Executive Read-Outs & QBRs | Cross-Functional Influence

EDUCATION & CERTIFICATIONS

M.S. Instructional Technology, Bloomsburg University, PA (4.0 GPA) | **B.A. Art**, Millersville University, PA

Certifications: Google Generative AI for Leaders | Lean for Financial Services, TIAA (inaugural class)
