PROFILE

I design AI enablement programs and then stand in the room and run them myself. The people who need it most are rarely the ones who sign up.

I spent 15 years at TIAA (Fortune 100, \$1.5T AUM), a business bound by fiduciary duty and operating under ERISA and SEC oversight, most recently leading AI adoption and workforce change. Before that, a decade in client-facing enterprise software at Pearson and Vangent, working directly with Fortune 500 buyers including Bank of America, GE Capital, Royal Bank of Canada, and Regions Bank. At TIAA I conceived and launched a 9-module AI-powered career development platform, then ran the enablement behind it myself, the town halls, roadshows, and team sessions that move people from having access to opening the tool. I cleared Risk, Compliance, and Legal without stalling the build. My M.S. in Instructional Technology is where the design discipline comes from.

PROFESSIONAL EXPERIENCE

Director, Business Management

February 2022 - July 2026

TIAA (Fortune 100 Financial Services, \$1.5T AUM)

Business Manager (2016-2022) | Senior Business Management Specialist (2013-2016) | Business Consultant (2011-2013)

Led AI adoption and capability initiatives across the Client Services organization (~3,000 associates) and the associate-transformation workstream of TIAA's Recordkeeping Transformation program. Partnered across HR, Risk, Compliance, Legal, Workplace Services, and IT.

AI Enablement, Facilitation, and Adoption

- **Reached 1,500+ associates directly across 30+ hands-on sessions I led myself:** Town halls, roadshows, workshops, demonstrations, and team sessions for technical and non-technical audiences. Designed each around work people already cared about instead of touring the technology, which is what moved people who were not looking for AI.
- **Moved skeptics by getting them building:** Sat with resistant associates and had them experiment until an idea took shape and they picked something to try. The objection was rarely the technology. It was people protecting the part of the job that made them feel valuable.
- **Conceived and launched a 9-module AI-powered career development platform:** Built for a transformation population, then rolled out company-wide to 16,000 associates. Owned the full lifecycle from discovery and use-case scoping through learning design, phased rollout, adoption, and impact measurement.
- **Measured adoption by usage, not access:** Defined the success measures and reported active usage to senior leaders. Access is the easy number. Usage is the one that tells a leader whether the investment worked.
- **Built the enablement assets behind the rollout:** A Manager Guide, prompt guidance, and role-based materials, plus one-on-one coaching for associates and people leaders who sought it out.

Responsible AI Inside a Regulated Business

- **Cleared Risk, Compliance, and Legal without stalling delivery:** Prototyped and pressure-tested the idea first, then brought them in as partners to set hard limits once it was worth building. No associate data on company servers, no AI-initiated actions, guided prompts that keep the person in control of the decision.
- **Worked inside real regulatory constraints for 15 years:** Fiduciary duty, ERISA, and SEC oversight shaped what could ship and how. I know how to move quickly inside those constraints.

Program Delivery and Executive Communication

- **Built one operating framework across seven Client Services business areas:** Connected them through named liaisons, shared strategy, and peer learning, so a single approach held across all seven. Set the operating rhythm, prioritization, and resource decisions that kept it running, with Risk, Compliance, Legal, and IT as concurrent partners.
- **Built and ran the Skills of the Future curriculum with a team of 7:** Five tracks of 12-17 modules each on future, digital-first, and AI skills, mapped to real role trajectories. 890 associates engaged.
- **Made the case to senior leaders in language they could act on:** Executive read-outs, people-leader updates, and quarterly business reviews carrying progress, trade-offs, and prioritization decisions across the organization.
- **Led change for workplace modernization across six locations (2022-2024):** 3,000+ associates through return-to-office, the Denver consolidation (44% footprint reduction), and the Frisco Corporate Center opening. Recognized as Change Champion.

Sales Engineer, Information Architect, Instructional Designer

2001 - 2011

Interactive Media / FT Knowledge / Pearson Performance Solutions / Vangent

A decade of client-facing enterprise software work. Continuous tenure through a chain of acquisitions, serving Fortune 500 enterprises and federal agencies.

- **Worked directly with Fortune 500 clients for ten years, several of them financial institutions:** Bank of America, GE Capital, Royal Bank of Canada, and Regions Bank, alongside Unilever and Verizon Wireless. Scoped capability needs, ran client sessions, and shaped multi-year implementation plans as sales engineer, instructional designer, and information architect.
- **Carried the technical answer into the client room without being the developer:** Built the sales-support tools used to win and deploy enterprise deals, and traveled internationally training enterprise teams.
- **Delivered enterprise platform programs:** Deployments for the 2010 Census and Extra Space Storage, redesigning the hiring workflows to cut client hiring costs 50-80%.

INDEPENDENT AI PRODUCTS CONCEIVED AND SHIPPED

- **Future Me, Answered (futuremeansanswered.com), live:** I conceived the product, designed the 5-stage discovery framework, structured the career data across 922 occupations, and built most of the application, directing the build on Next.js and multi-provider AI. My brother engineered the production backend.
- **CareerPointers (careerpointers.org), live:** I conceived and designed the 11-module journey, its multi-agent AI interview simulator, and personalized delivery, and directed the build. My brother is the primary engineer.

CAPABILITIES

Enablement & Adoption: AI Enablement Program Design | Workshop & Training Facilitation | Executive and End-User Sessions | Adoption Strategy | Champion & Liaison Networks | Change Management | Instructional Design (M.S.)

AI Fluency: Generative AI in Business Workflows | Agentic & Multi-Agent Systems | Claude as deepest build tool, hands-on with Microsoft Copilot and ChatGPT | Responsible AI Governance

Measurement & Delivery: Adoption & Usage Metrics | Impact Measurement | Operating Rhythm & Governance | Prioritization | Program & Portfolio Management | Budget (~\$500K)

Regulated Environments: Financial Services (15 years) | Fiduciary, ERISA & SEC Context | Risk, Compliance & Legal Partnership | Enterprise Platforms (LCMS, ATS, SharePoint at 200+ sites)

EDUCATION & CERTIFICATIONS

M.S. Instructional Technology, Bloomsburg University, PA (4.0 GPA), the graduate credential behind the instructional design work | **B.A. Art**, Millersville University, PA

Certifications: Google Generative AI for Leaders | Lean for Financial Services, TIAA (inaugural class)
