EXECUTIVE PROFILE

I am technically fluent enough to scope a problem, tell a good technical answer from a bad one, and direct a build to the finish. I am not the engineer. The AI products I have shipped are the proof I do not need to be.

I close the gap between AI investment and real workforce change. I spent 15 years at TIAA (Fortune 100 financial services, \$1.5T AUM), most recently leading AI adoption in a heavily regulated environment. I conceived and launched a 9-module AI-powered career development platform, built for a major transformation population and then rolled out company-wide, and owned it from the first discovery conversation through use-case scoping, governance, deployment, and measured use. I built the operating framework that connected seven business areas so one approach held instead of seven. Before TIAA, ten years in enterprise software at Pearson and Vangent, architecting and implementing LCMS and ATS platforms for Fortune 500 buyers. My M.S. in Instructional Technology grounds the work in how people learn and change.

INDEPENDENT AI PRODUCTS CONCEIVED AND SHIPPED

- **Future Me, Answered (futuremeansanswered.com), live in production:** I conceived the product, designed the 5-stage discovery framework, modeled the career data across 922 paths, and directed the build on Next.js, the Vercel AI SDK, and multi-provider AI. My brother is the primary engineer. I own the product decisions and stay close enough to the technology to judge what is worth building.
- **CareerPointers (careerpointers.org), live:** I conceived the product and designed the 11-module journey, the multi-agent AI interview simulator, the applicant CRM, and the employer-personalized portfolio delivery. I directed the build on Next.js and Stripe. My brother is the primary engineer.

PROFESSIONAL EXPERIENCE

Director, Business Management

February 2022 - July 2026

TIAA (Fortune 100 Financial Services, \$1.5T AUM)

Business Manager (2016-2022) | Sr. Management Specialist (2013-2016) | Business Consultant (2011-2013)

Led enterprise initiatives across the Client Services organization (~3,000 associates) and the associate-transformation workstream of TIAA's Recordkeeping Transformation program. Partnered across IT, HR, Workplace Services, and Risk and Compliance.

AI Enablement Roadmap, Use-Case Pipeline, and Governance

- **Took an AI platform from idea to embedded use across the enterprise (2024-2025):** Conceived, designed, and launched a 9-module AI-powered career development platform, built for a major transformation population and then rolled out company-wide. Owned every stage, from discovery and use-case scoping through prioritization, phased rollout, governance, adoption strategy, and impact measurement.
- **Set the governance standards that let AI ship inside a regulated business:** Prototyped in a sandbox first, then brought Risk, Compliance, and Legal in to set the hard limits once it was worth building. No associate data on company servers. No AI-initiated actions. Guided prompts and human oversight that keep the person in control of every decision.

- **Measured adoption by active usage, not headcount with access:** Defined the success measures for the AI work and reported the usage number to senior leaders. Access is the easy number. Usage is the one that tells a leader whether the investment worked.

Adoption Programs, Champion Networks, and Enablement Design

- **Built the champion network and community of practice that carried adoption:** Led project teams of 10+ and directed contractors, then built the dotted-line network of liaisons, champions, and engagement leads that moved the work across Client Services. My teams have been lean on purpose. The reach came from the network, not the headcount.
- **Built and ran the Skills of the Future curriculum with a team of 7:** Designed 5 tracks of 12-17 modules each on future and digital-first skills for Client Services and other large associate populations. 890 associates engaged across 1,156 interactions.
- **Designed the enablement people actually showed up for:** Built the town halls, roadshows, training, and coaching around work associates already cared about, for technical and non-technical audiences alike.

Operating Model, Vendor Selection, and Executive Engagement

- **Built one operating framework across seven business areas so good work scaled instead of being rebuilt:** Connected seven Client Services business areas through named liaisons, shared strategy, and peer learning, moving each from pilot to a sustained, supported operating model. One approach in place of seven.
- **Served on a structured enterprise vendor selection:** Earned a seat on TIAA's corporate selection team that evaluated and chose the enterprise recognition platform, after growing the Client Services program 395% on a \$500K budget.
- **Made the case to senior leaders in language they could act on:** Built and delivered executive read-outs, business cases, people-leader updates, and quarterly business reviews, carrying progress, trade-offs, and prioritization decisions across the organization.
- **Led workplace modernization for 3,000+ associates across six locations (2022-2024):** Owned change strategy through return-to-office, the Denver consolidation (44% real estate footprint reduction, 700+ associates moved to hoteling), and the Frisco Corporate Center opening. Recognized as Change Champion.

Sales Engineer, Information Architect, Instructional Designer

2001 - 2011

Interactive Media / FT Knowledge / Pearson Performance Solutions / Vangent Human Capital

Continuous tenure through a chain of acquisitions, serving Fortune 500 enterprises and federal agencies.

- **Sat between the client's business problem and the team that had to build it, for ten years:** Worked directly with Fortune 500 clients (Unilever, Bank of America, Verizon Wireless, GE Capital, Regions Bank) to scope capability needs, design adoption approaches, and shape multi-year implementation plans.
- **Architected the knowledge model behind an enterprise LCMS:** Single-source publishing across five Fortune 500 enterprises, knowledge-management and taxonomy work two decades before it was common. Field-driven ATS enhancements cut client hiring costs 50-80% and speed-to-hire in half.

LEADERSHIP CAPABILITIES

AI & Enablement: AI Adoption Strategy | Use-Case Discovery & Prioritization | AI Enablement Roadmaps | Responsible AI Governance & Acceptable-Use Standards | Champion Networks & Communities of Practice | Agentic & Multi-Agent Workflows | Hands-on across Claude, ChatGPT, Microsoft Copilot, Gemini, Kiro, GitHub Copilot

Operating Model & Delivery: Operating Framework Design | Team Leadership & Contractor Direction | Adoption & Impact Measurement | Change Management | Risk, Compliance & Legal Partnership | Enterprise Vendor Selection

Enterprise & Executive: Enterprise Software Delivery (LCMS, ATS) | Knowledge Management & Taxonomy | Microsoft 365, SharePoint (200+ governed sites), Teams | Executive Read-Outs & Business Cases | Budget (~\$500K)

EDUCATION & CERTIFICATIONS

M.S. Instructional Technology, Bloomsburg University, PA (4.0 GPA) | **B.A. Art**, Millersville University, PA

Certifications: Google Generative AI for Leaders | Lean for Financial Services, TIAA (inaugural class)
